

## PANEL JUNCTION BOX

### Key Features:

- \* Requires no potting of the inside of the junction box.
- \* Offers different diodes to optimize diode performance.
- \* Terminates the foil leads from the module by using a spring clamp to clamp to the contact rail inside the junction box eliminating the need for soldering or welding.
- \* Connectors are rated to IP67.
- \* Connectors have the latching locking feature.
- \* Junction box lid uses two latches for securing the lid to the lower box housing.
